

**Printing International and APE showcase  
their innovations at PHARMAPACK 2010!**

Paris, November 19, 2009. The 9<sup>th</sup> edition of Pharmapack 2010 will gather over 200 exhibitors comprising the leading international suppliers of printing and labelling solutions for the pharmaceutical industry. Here are the innovations presented by PRINTING INTERNATIONAL and APE.

**PRINTING INTERNATIONAL**

**New ultra-high quality printer for plastic and aluminium medical devices**

New markets and the demand for flexibility, differentiation and speed to market allowed Printing International to introduce the new ultra-high quality CHIRON Ring Print equipment. The machine is capable of running plastic and aluminium medical devices of different shapes to print in one or multi colours for medium and high volumes. Quality can be controlled with optional camera and individual rejection. If required, Printing International's machinery is manufactured for clean room environment in accordance with cGMP standards. Full GAMP validation papers can be provided. Machine operational software is also CFR21 part11 compliant. Printing International wide range of consumables includes a large supply of FDA approved pads and USP class VI inks for all applications.

**APE**

**BI-ETIQ and TRI-ETIQ to communicate more information**

APE is a leader in self-adhesive labels, soap paper, film, complex... and develops new products regularly. At Pharmapack 2010, the company will present two of these news products: BI-ETIQ and TRI-ETIQ. The BI-ETIQ solution is a TWIN LABEL with 3 printed pages whereas the TRI-ETIQ comprises 5 printed pages. They can be easily and cleanly opened and closed, and enable to communicate more information
